Skills

- **I know**: Java (Android), C, C++, HTML, CSS, JavaScript, PHP, Python
- **I've used**: Github, MySQL, Bootstrap, JQuery, Google App Engine, Google Cloud Messaging

Programming Projects

- **3D Viewer** (Java: Android)
  - Takes sets of connected 3D points and projects them onto screen, written from scratch.
  - User can walk and jump using screen controls and look around by turning phone.

- **Android Game** (Java: Android)
  - User controls avatar who fights groups of enemies and explores in top down levels.
  - Enemies try to work together, guess players movement, path around objects, dodge, etc.

- **Notifications Manager** (Java: Android)
  - User creates sets of rules defining which programs and contacts vibrate or ring their phone.
  - User also chooses times when the rule sets switch automatically. (Eg. when works starts)

- **Find Me** (PHP, Cloud SQL, HTML/CSS)
  - User creates lists of items with location tags. Lists can be shared between accounts via email.
  - Items can easily be moved, added, deleted, or searched for. Full lists can also be displayed.

- **Personal Website** - jzukewich.me (JavaScript, HTML/CSS)
